

# Forming Process Optimization

## Technological Check for MDF, OSB and PB plants

Achieve optimal forming accuracy in support of high board quality and greater material savings. Our technologists support you with a detailed check of your forming process. This includes, for example, analysis of conditions of rolls in the bunker and forming station. Last, we'll review the results with you and discuss your optimization potential.

### Product highlights

- Lab analysis of fibers, particles and strands
- Check of forming station equipment and settings
- Analysis of board quality
- Optional remote concept
- Final report with documentation
- Review of optimization potential

### Customer benefits

- Increased forming accuracy
- Higher board quality
- Less raw material consumption
- Higher efficiency

Price  
**< 7.500 €**

Duration  
**6 days**

Downtime  
**5 hours**

### About our Technological Optimization Packages

Based on an in-depth data analysis, our experienced technologists will review specific sections of your production process. Each check starts with a joint kickoff meeting and checklist-based preparation. Accordingly, your equipment, process and required parameters will be analyzed in depth. This evaluation may include, for example, the analysis of raw material or board samples in Dieffenbacher's technology center. Finally, our experts will discuss their findings with you, recommend actions for optimization and provide you with a detailed report.

The numbers mentioned in this flyer are estimates and may vary in each individual case. Prices do not include travel and accommodation cost.
