Our solution

Recycling wood processing
- Pre-crushing
  - Crush raw material of various sizes and properties
  - Maintain maximum flexibility in choice of input material
- Oversize removal
  - ClassiScreen screens crushed raw material quickly and reliably
  - Excessively large pieces of wood are fed back into the pre-crusher
  - Increase your recycling rate
- Shredding
  - Create consistent material sizes for further processing
  - ClassiSizer
- Screening and cleaning
  - Reliably screen out impurities with ClassiCleaner+ technology
  - Minimize wood losses through maximum cleaning efficiency
- Particle preparation
  - Produce high-quality particles for your end products
  - Extend the service life of knives in the knife ring flaker
- Clean particles
- Material utilization

Impurities
